The Hour of Code is coming to SEES!

Last year, 15 million students worldwide learned an Hour of Code and students at SEES were part of that event! This year, we are participating again with the goal of having every student at SEES complete an hour of code. Students will also be starting on a program that includes the option to complete a 20 hour K-5 Computer Science course.

What is The Hour of Code?

Check out this video [http://youtu.be/rH7AjDMz_dp](http://youtu.be/rH7AjDMz_dp)

SEES Hour of Code will begin this week in the computer lab led by Mrs. Rocket, our amazing technology teacher. Classes will be supported by our Tech Team of students who have been working on this program for several weeks. The SEES Hour of Code will continue through the month of December!
